

Summary: When coming with the design for the website, I wanted to give it a clean design and more modern. Looking at the original website, there are a lot of things that are cluttered together and it's just not appealing to the eye. It is also hard to figure out where everything is so I made it easier to find the pages with a navigation menu. I also designed a logo for their website to have it displayed on each page. The color palette I used was blue, white, and black. This will accomplish a clean and modern look that I am going for. At the same time, the blue symbolizes their website name "Cloud 9 Walkers". The first thing I thought in my mind was the color blue when I read the name.

Design Palette: I choose #77A5B8 for the hover action on the navigation bar. The background color of the whole website is #FFFFFF and when they hover over the pages on the navigation bar it will be #77A5B8. I use the color #173358 for the background color of the navigation bar when it changes from desktop to mobile view. I chose this color because it would contrast against the blue of the logo. I chose the color #6B9BDA for the hover in the mobile navigation bar to contrast against the background color.

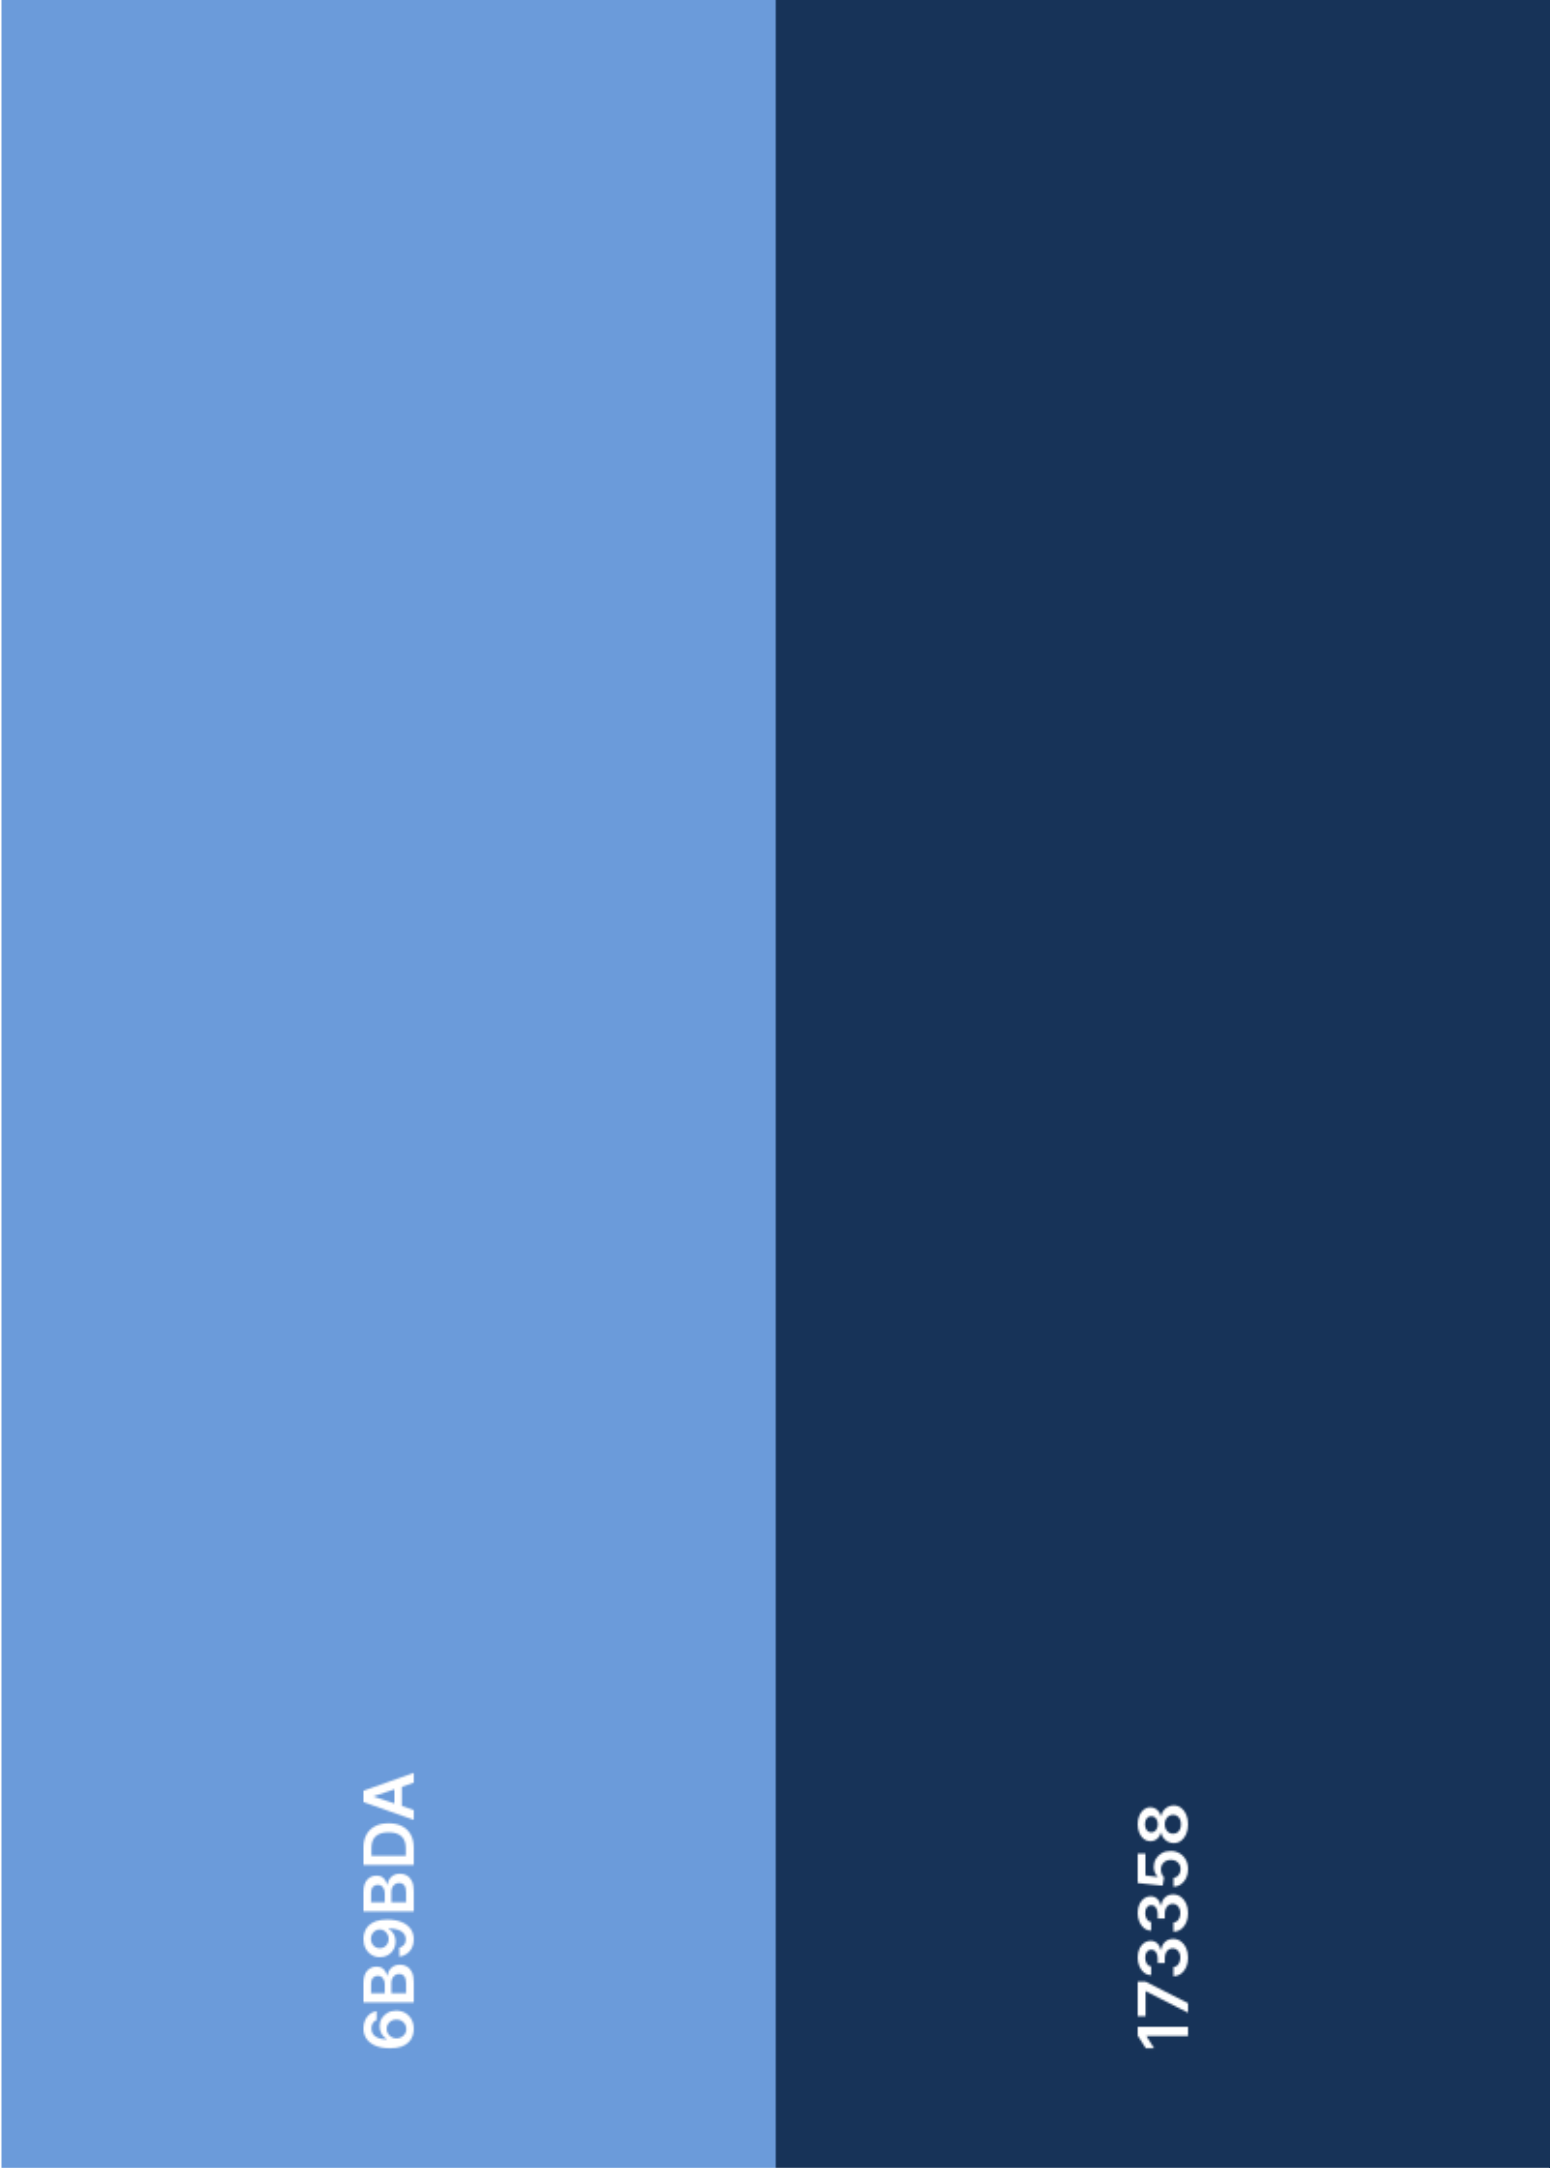

The whole website has only one font and it is the font family: “Raleway, “Montserrat” I used this font because it gave a clean and modern look towards the design.

In the page named “Previous Owners”, I used border properties such as color, solid, and ridge. The reason I used this was for the reader to be able to distinguish between the different owners while still keeping that neat look
